***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3, the allowability in combination with the other claimed features is because nowhere in the prior art is there an electromagnetically operated device having a rod extending along an axis of the cylinder, located in an inner hollow of the cylinder, and having at least a part composed of a electromagnetically soft material, the armature being formed so as to close the magnetic guide with formation of a three dimensional closed structure including the cylinder. Regarding claim 2, the allowability in combination with the other claimed features is because nowhere in the prior art is there an electromagnetically-operated device, having a supply of a first pulse providing a closing of a magnetic circuit and minimization of magnetic resistance of the magnetic guide due to minimization of the air gap of the magnetic guide with subsequent maximization of the magnetic flux and the magnetic guide with its transfer to one of the stabile condition characterized by a maximum value of a magnetic flux in the magnetic guide which corresponds to an energy of the controlling pulse action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Citation of Pertinent Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
